

Food Quality and Safety Policy

The most important goal of Supravis S.A. is the production and sale of packaging for mass-use products that meet the requirements and expectations of customers, using renewable natural resources, and building a significant position in the packaging industry.

Being aware that packaging has an important impact on food safety, we act in a manner aimed at ensuring the safety of products manufactured by our company. Each employee, regardless of their position, is responsible for the effective implementation of the objectives of this Policy.

We achieve our goals through:

- production of high-quality products that meet the highest safety standards and legal requirements,
- taking responsibility for the quality and health safety of manufactured products by all employees of the company, implementing the Food Safety Culture,
- identifying and meeting customer needs, expanding the range of products and service,
- understanding the importance of customer satisfaction,
- implementation and development of modern techniques and production technologies,
- involvement of the top management and ensuring funds for the implementation of the adopted goals and sustainable development,
- ensuring effective internal and external communication,
- ongoing monitoring and evaluation of suppliers of raw materials, maintenance and transport services and subcontractors,
- continuous improvement of all processes in accordance with the implemented standards BRC Packaging Materials, ISCC Plus,
- improving the systemic approach aimed at preventing errors,
- education and improvement of employees' qualifications by conducting planned trainings and evaluating the effectiveness of these trainings,
- creating a team of highly qualified employees being aware of the company's vision,
- supporting the initiative of employees in the area of product quality improvement, production cost reduction and raising the work safety standard,
- risk analysis of undertaken actions and threats,
- a strategy for the use of circular raw materials from recycling and renewable BIO materials.

An important element of achieving above assumed goals is compliance with the law and the principles of business and work ethics.
